## ABOUT US

We are a industrial 3d printing company focuses on area automotive, manufacturing and oil and gas sectors. As an industrial 3D printing company, we seamlessly bring your ideas to life by our expert team and advanced 3d printing technology.

Our creative ideas has no limits and we spare no efforts to make the impossible reality. Precision, speed, and quality is our main goal.

## OUR SERVICES

PF offers 3D printing various materials solutions to a wide range of industries. Among the main ones include:

### ● AUTOMOTIVE

- Reverse engineering for out of production parts.
- providing customized parts as per customer requirements.
- Low volume production.

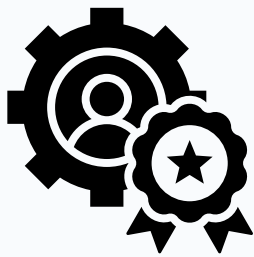

### ● MANUFACTURING

- Develop a custom parts for more efficiency and reduce time and cost.
- Optimized parts availability and eliminating physical storage.

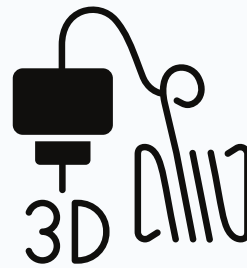

## ABOUT CAPABILITIES

In a world increasingly defined by depth and dimension, we at PF are proud to stand at the forefront of 3D technology. We bridge the gap between vision and creation, harnessing the transformative power of 3D technology to deliver an unparalleled range of capabilities.

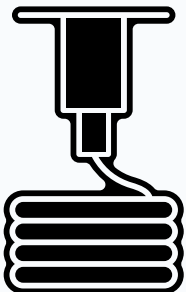

### Specialized

We go beyond simply providing 3d models and toys part. With our expert team and high quality printers. We are first 3d company in UAE specialized in Automotive parts including end-use part.

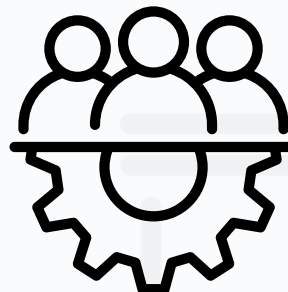

### So Far

We are proud to print over 500 parts and more than 50000 successful printing hours. We have printed parts with more than 1.5 m.

### Various Types Of Materials

In PF we believed in quality and value of money. We choose the printing material based on the requirements. No more spend time and money on materials that are more or less than the needs.

### Expert Team

Our Team understand the unique requirements of the customer. They possess years of experience in 3D printing and various industries, offering diverse perspectives and insights.
